Make it real.

Our brand story

Capgemini

Make

it

real.

THE PILLARS OF ‘MAKE IT REAL’

Real vision

We bring the **depth of business and technology expertise** to help you **build a strategic vision** and **transform your business.**

Deeply human

We **put people and partnership first**, fostering a culture where people thrive, and working side-by-side with clients, from end-to end.

AI-powered

We **harness AI’s real potential** in everything we do – complementing human resourcefulness to help our people, and clients achieve more.

Real value

We’re **obsessed with delivering impact** - we conceive, and commit to creating **positive change that really matters to our clients.**

Now how does it
come to life?

How we show up
A bold, intelligent and warm personality and tone of voice

Our brand personality and tone of voice are built around three principles:

Bright.

We are perceptive, thoughtful, and curious, sharing intelligent insights infused with optimism and approachability to create genuine human connection.

Driven.

We are outcome focused, action-orientated and direct, cutting though with efficient language and impactful messages.

Empowering.

We communicate with precision and purpose, removing complexity and providing clarity that inspires action and leaves people feeling capable and supported.

What does it mean in tone?

We are intelligent and warm.

We are future-positive and engaged, delivering practical advice, data and proprietary insights with the warmth and enthusiasm of a trusted advisor.

We are focused and precise.

We are absolutely committed to our goals, persisting through tough challenges and always focused on outcomes to deliver change that really matters.

We make clarity a catalyst.

We are empathetic and inclusive, empowering our audience to act with confidence through clear, informative and conversational language that showcases our depth of experience.

Real refreshed
Visual identity toolkit

Making our mark
A cleaner, stronger logo in a single high-contrast color, alongside a confident new brand promise that states our intent.

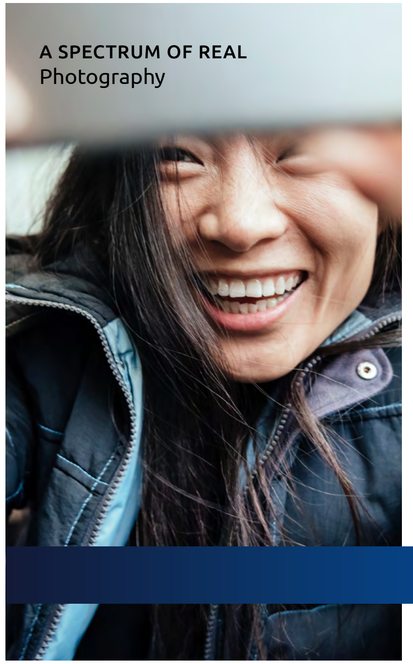
Bringing blue to life
A bold primary palette that energizes our signature blue, complemented by a suite of warm, natural colors.

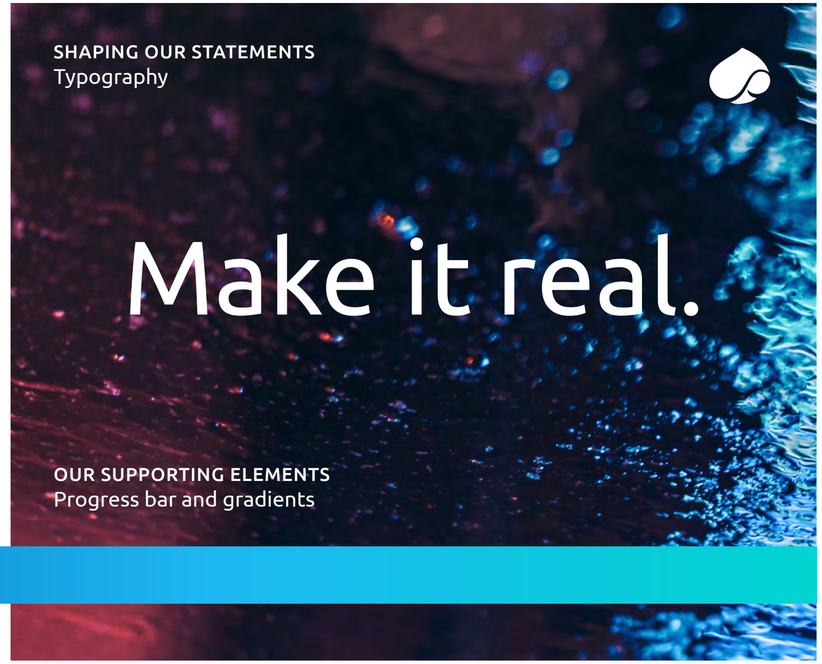
A spectrum of real
A rich, editorial photographic style provides that adds warmth, emotion and real human interest to our communications.

Supporting elements
A distinctive new gradient and 'Progress Bar' that add interest and recognition, bringing compositions to life.

MAKING OUR MARK
Logo

BRINGING OUR BLUE TO LIFE
Colors





Making our mark
A trio of bold identifiers to suit every application

We establish and reinforce our brand presence with a system of marks.

Primary logo
Our primary logo is our most important visual element. It consists of our wordmark and spade symbol and is used in most instances when we communicate our brand.

Spade symbol
In some instances we use only our Spade symbol to communicate Capgemini in shorthand when the primary logo has already been used.

Make it real.
We also make our mark by using our Brand Promise to make bold statements across our communications.

Our brand promise should always appear with either our full logo or spade symbol to create clear association. Unless used at the beginning or in the middle of a sentence where proper grammar prohibits, it should be written in sentence case with a period at the end: Make it real.

PRIMARY LOGO

SPADE SYMBOL

MAKE IT REAL

Make it real.

Making our mark
A single color logo with in variations to maximize contrast

Our Capgemini logo should always appear in Capgemini Blue or White. Where possible we should prioritise Capgemini Blue, but choose the color that would provide the most optimal contrast to the background.

DOWNLOAD

Bringing blue to life
A distinctive, ownable palette, enhanced by warming natural tones

Primary palette
Our signature colors range in a tonality of blues and show up in our work, and in the experiences we shape.

Secondary palette
Supporting our signature blues, our secondary palette adds warmth to our applications. They should be used in small amounts to add a pop of color such as highlighting messaging or in infographics.

Tints
We have a palette of blue tints that can be used for additional flexibility.

These can be used digitally and in long form print communications, to add pace and help break up information within editorial design as well as within infographics.

For more guidance on available tints, please refer to the digital UX / UI guidelines.

Shaping our statements
Typeface usage

Through scale and different weights we can inform, involve and engage our audiences.

Ubuntu regular is generally our default weight across all levels of type hierarchy. Light can be used at certain levels if regular looks too heavy.

Bold, medium and italics are used to create emphasis within copy.

The notational treatment of using all caps should be used with discretion. It is primarily for supporting information such as header or footer copy, callouts, and eyebrows.

UBUNTU REGULAR, MEDIUM, MEDIUM ITALIC, LIGHT

Hero statements and headlines look *like this.*

UBUNTU REGULAR, ITALIC, LIGHT

Our introduction copy looks like this and reads *like this.*

UBUNTU BOLD, REGULAR, LIGHT

Our body headers look like this
Our body copy looks like this, ut odi omnis volupta tescidusa ium, ommolut et deles et aut que expliquia nis ea que cum quatibus et re eaquibu sapellatusa estem. Ut quam et et as ate mi, offictu sandit ut officil experaturia dellendist, quae in comnienet quam dis iur at alit venis utectat.

UBUNTU ITALIC

Italics can be used to empasize or highlight copy,
Odi omnis volupta tescidusa ium, ommolut et deles et aut que expliquia nis ea que cum Taecto is soluptas doloribus.

UBUNTU REGULAR, MEDIUM, LIGHT

OUR NOTATIONS LOOK LIKE THIS, SLIGHTLY TRACKED AND IN UPPERCASE USING REGULAR AND **MEDIUM WEIGHTS.**

Our supporting elements
A bold gradient to bring vibrancy to key moments – The Progress Bar

Our visual embodiment of progress, the Progress Bar is a recognizable Capgemini brand asset that adds movement and interest to our communications.

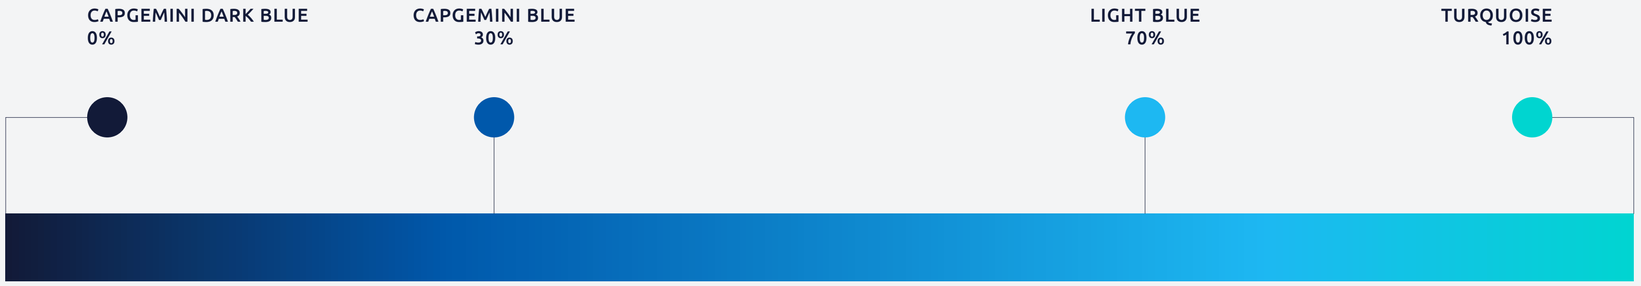
The progress bar is not a template design element. It should be used sparingly and always in a way that interacts with your content.

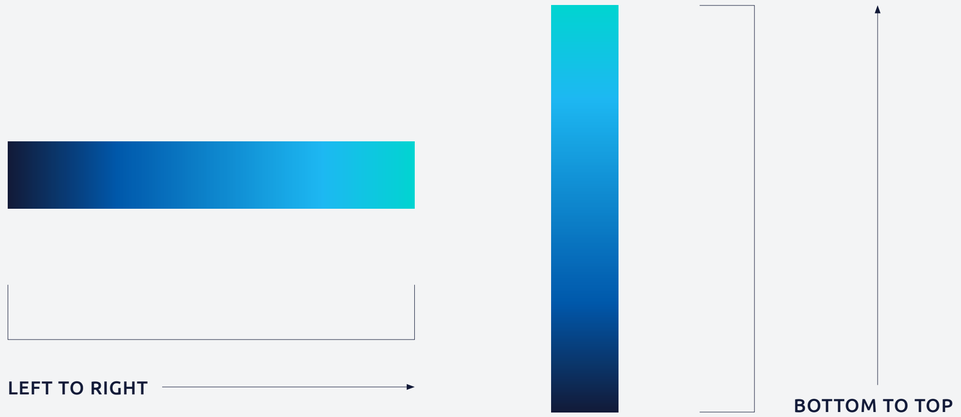
Usage and placement
The progress bar should always serve a clear purpose, such as an accent, highlight, divider or a subtle fill and in motion. It should not appear on every page, or in the same way throughout an entire document and should never be used behind text or as a background.

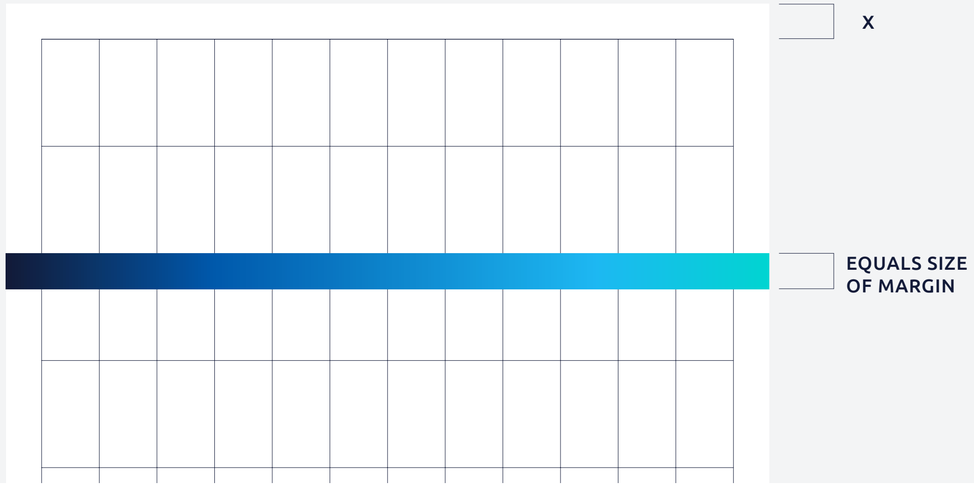
The progress bar should be anchored to the grid, but there are no fixed rules for where it should or should not be positioned.

Size
The shortest side of the progress bar is typically equal to the margin, but can be wider in certain situations such as merchandise. Always exercise creative judgement to ensure compositions remain balanced.

Gradient
The gradient is always constructed as shown here and runs in the same direction. Where possible, the full spectrum of gradient colors should be used, but exercise creative judgement if a partial gradient may be more suitable in cases where a shorter progress bar is needed.







A spectrum of real
Warm, editorial photography that shows the real-world impact of our work.

Our spectrum of real imagery is split into 3 distinct pillars:

Human
Real people in the real world, in authentic settings.

Our images should be:
Warm and human
Captured in the moment
Diverse
A story / connection
Authentic

Industry
Real places our work shows up, and the benefits it creates.

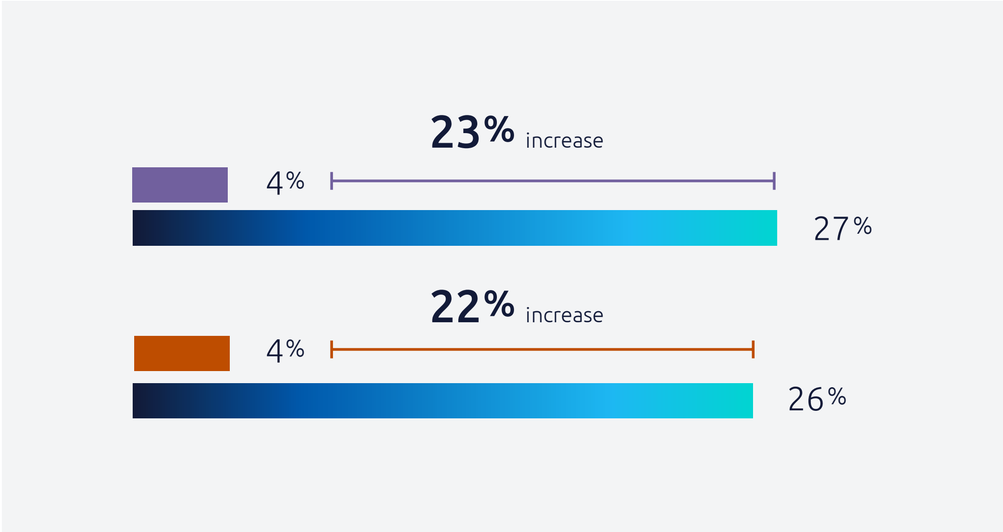
Our images should be:
Disruptive
Different
Curious

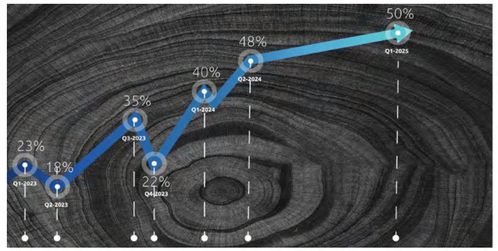
Texture
Real textures of the world around us.

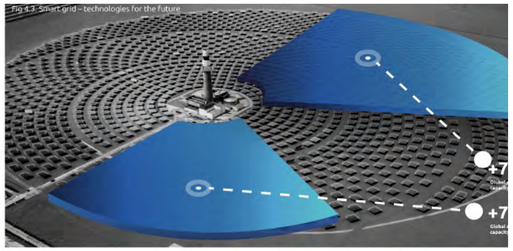
Our images should be:
Abstract
Graphic
Connected
Minimal

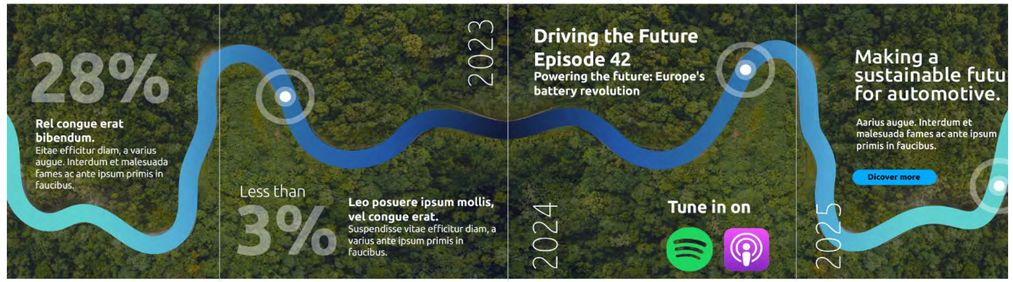
Our supporting elements
Infographics

Infographics, like iconography, provide a clear and simplified way to present complex information. We utilize clear use of typography and our full color palette to create distinction between data sets to make information easier to understand for the viewer.









Our supporting elements
Icons

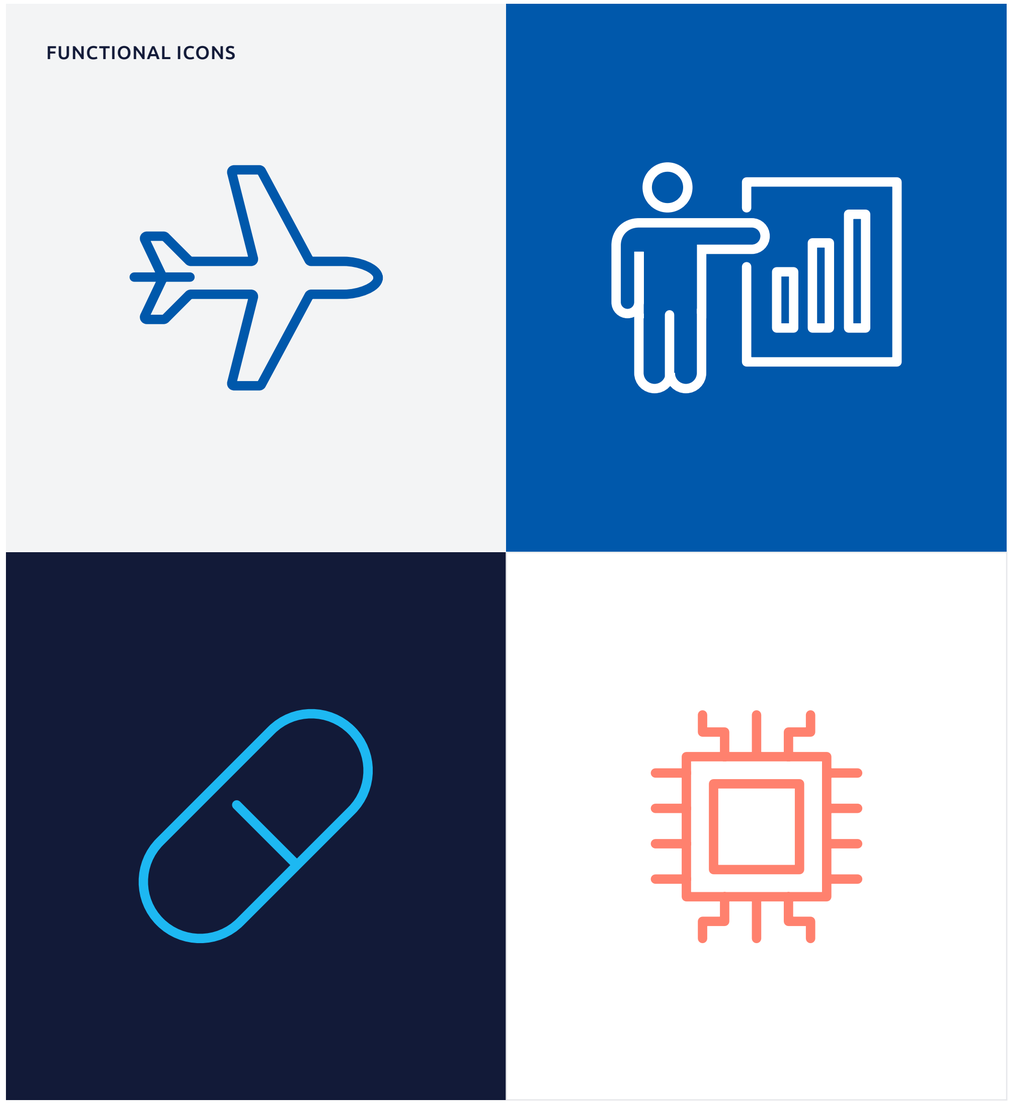
Iconography is a helpful, supporting element within our system that simplifies complex information and helps with immediate visual recognition while also providing functionality across digital interfaces.

Functional icons
Our general style are simple lineart icons. They have rounded corners and rounded tips for added softness which balances well within our structured layout system.

They should be used in single colorways that provide the best contrast within the communcation.

Stylized icons
When needing to drive more emphasis or create an interactive feature on digital platforms to signify an active state, the gradient from our Progress Bar can be used within the icon's lines.

FUNCTIONAL ICONS



STYLIZED ICONS

Make

it

real.
